

List splitting

Ordered lists should continue numbering across pages.

Default unordered list

- Default unordered list items use a built-in disc marker.
- Only direct child paragraphs receive markers automatically.

Default ordered list

1. Default ordered list items use decimal markers.
2. Markers auto-size so double-digit ordinals stay aligned.

Custom bullets

- ★ Custom unordered lists can reuse named bullet styles.
- ★ This example uses a filled star marker.

1. This first ordered item is intentionally long so the list container must split it across pages without reprinting the marker on the continuation fragment. 2. Second ordered item continues the numbering after the split.
3. Third ordered item confirms numbering remains stable on later fragments.
4. Fourth ordered item keeps the decimal sequence going.
5. Fifth ordered item leaves enough content to require a continuation page.
6. Sixth ordered item should not restart at one.

List splitting

Ordered lists should continue numbering across pages.

7. Seventh ordered item remains aligned with the rest of the list.
8. Eighth ordered item gives the second page more than one ordinal.
9. Ninth ordered item keeps the list moving.
10. Tenth ordered item exercises double-digit width alignment.
11. Eleventh ordered item keeps the auto-sized marker slot in use.
12. Twelfth ordered item closes the sample.
13. Thirteenth ordered item keeps the list going.
14. Fourteenth ordered item adds one more body row.
15. Fifteenth ordered item confirms numbering stays monotonic.
16. Sixteenth ordered item leaves no room for a restart bug.
17. Seventeenth ordered item ensures a later fragment still has markers.

Odd list footer

List splitting

Ordered lists should continue numbering across pages.

18. Eighteenth ordered item keeps the footer and marker logic busy.
19. Nineteenth ordered item remains aligned in the same slot width.
20. Twentieth ordered item finishes the ordered sequence.
