

Generalized List Bullet Templates

Built-in list aliases

ul

- Uses the predefined unordered bullet style.
- Only direct child paragraphs receive markers.

ol

1. Uses the predefined ordered bullet style.
2. Numbers are formatted at layout time.

Image plus generated ordinal

-  1. The image bullet and the generated number each reserve their own slot.
-  2. Double markers are useful when matching a legacy report layout.
-  3. The paragraph text wraps after both bullet slots.

Custom format on a div

- ★ 1) A vbox can use the same bullets attribute as ol and ul aliases.
- ★ 2) The second bullet uses format="%d)" for custom numbering.
- ★ 3) Authors can combine shape, image, text, and formatted bullets.
