

## Table auto height split

This direct page-child table is a height="auto" child of the page vbox. Each split fragment receives the remaining page height, then shares surplus only with the height="auto" table rows present on that fragment.

| Repeating table header |              |
|------------------------|--------------|
| row 1 A                | row 1 B      |
| row 2 auto A           | row 2 auto B |
| row 3 A                | row 3 B      |
| row 4 A                | row 4 B      |
| row 5 auto A           | row 5 auto B |
| row 6 A                | row 6 B      |
| row 7 A                | row 7 B      |
| row 8 auto A           | row 8 auto B |
