

# Positioning

Absolute widgets use page coordinates.

Dotted box: left="0.75" top="1.45"

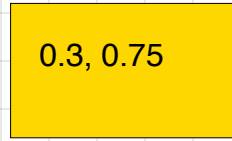

Label widget: left="1.0" top="1.85"

Blue box: left="1.0" top="2.55"

Relative widgets use container coordinates.

0.3, 0.75

-0.3, -0.3

Default vbox flow with an auto-positioned child.

The green box sets left/top without an explicit position, so it follows relative positioning inside an ordinary container.
