

# Image placement via render-ltml

This LTML sample mirrors samples/test\_014\_images.go using uploaded image files rendered through either the local or remote render-ltml path.

|                                                                                                                                                                     |                                                                                                                                                                      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>JPEG width fixed to 1.8 in</b></p>  <p>height inferred from 227 x 149 px</p> | <p><b>JPEG height fixed to 1.4 in</b></p>  <p>width inferred from 227 x 149 px</p> |
| <p><b>JPEG native size from metadata</b></p>  <p>227 pt x 149 pt footprint</p>    | <p><b>JPEG forced to 1.7 x 1.1 in</b></p>  <p>aspect ratio ignored</p>             |
| <p><b>PNG width fixed to 2.4 in</b></p>  <p>height inferred from 226 x 79 px</p> | <p><b>PNG forced to 1.7 x 1.1 in</b></p>                                         |
